37th Tokyo Motor Show – Passenger Cars & Motorcycles (2003) Response to implementation of the Health Promotion Law

With the implementation of the Health Promotion Law on May 1 of this year, the administrators of facilities used by large numbers of people are now required to put in place measures to prevent such users from being subjected to passive smoke. As a response to this new Law, we will implement non-smoking regulations and establish separate specified smoking areas at the Tokyo Motor Show.

1. The Health Promotion Law (excerpt)

Chapter 2: Prevention of Passive Smoke

Article 25: Administrators of facilities used by large numbers of people – including schools, gymnasiums, hospitals, theaters, performance venues, meeting halls, exhibition venues, department stores, offices, government and other public facilities, and eating and drinking establishments – are required to put in place measures required to prevent users of these facilities from being subjected to passive smoke (i.e., inhalation of smoke produced by other persons smoking in an indoor or otherwise enclosed environment).

2. Response at the Tokyo Motor Show Venue

1) Completely non-smoking areas	Within exhibition halls (West, Central, East, North, and Event Halls) * Smoking areas must not be established within booths. (Smoking in exhibitors' staff rooms will be left up to the discretion of the exhibitors.) * Ashtrays previously installed in front of the washrooms on the north side of the West, Central, and East Halls will be moved to the outside service passageway. Children's play area, 2 nd floor, North Hall Press Center
2) Facilities with separate smoking and non-smoking areas	International Conference Hall, Central Mall on 2 nd Floor of West, Central, and East Halls, outside * Limited to specified areas where ashtrays are installed.

*The "Application for Providing Smoking Area" as stipulated in the Tokyo Motor Show "Regulations" (P. 18) will no longer be available.

3. Installation of Air Cleaning Devices (tentative)

With cooperation from Japan Tobacco Inc. (JT), we plan to install cigarette smoke air cleaners in the Central Mall on the 2nd floor, and in the Exhibitors' Common Lounge (Parts Division), and to install JT's "SmoCar" smoking trailer (1 trailer) in the outdoor rest area.
