

**37th Tokyo Motor Show – Passenger Cars & Motorcycles (2003)**  
**Regarding Provision of High-speed Communication Line (TMS-net)**

In light of the growing popularity of broadband in recent years, the Secretariat will now be offering a new high-speed Internet connections service (TMS-net) for a usage fee of 200,000 yen per contract in addition to the communication lines provided to Exhibitor Booths in the past (analog lines: 74,000 yen; ISDN lines: 100,000 yen). We hope that you will find this service useful in your Exhibits.

To apply for this service, please use the on-line application form entitled “Application for temporary communication system installation.”

Specifications

- Connection format: B-flets (NTT)
- LAN: Optic fiber cable network in the Nippon Convention Center
- IP Address: Local IP (automatically obtained via DHCP)  
Global IP (fixed IP notified from Secretariat): Separate fee: 30,000 yen
- Interface: Ethernet ( 100BASE-TX/10BASE-T )
- No. of terminals: Five terminals per contract.  
\* 2 contracts are required to connect 6 or more terminals.  
\* Regardless of the number of contracts, only one line will be provided to each booth.  
\* When connecting multiple terminals, Exhibitors shall provide their own HUBs or other splitting devices.
- Connection speed: 10 to 30 Mbps per terminal. Note, however, that connections speeds are dependent on the communication and terminal conditions. The above speed is only a guide; it is not guaranteed.
- Period of use: From October 18 (Sat.) at 8:00 to November 7 (Fri.) at 12:00 noon (21 days)

\* This service cannot be used as an IP telephone.

For technical inquiries regarding high-speed connection lines (TMS-net), contact:  
NTT East Japan, Chiba Office
